Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on _____.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION***Election/Restrictions***

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species (or sub-genera) are as follows:

A) for volatile corrosion inhibitor: (1) organic non-heterocyclic amines, and their organic or inorganic salts (dicyclohexylamine, cyclohexylamine, diisopropylamine, benzylamine, hexamethylenetetramine); (2) heterocyclic compounds (morpholine, imidazole, triazole) and their derivatives; (3) inorganic salts of nitrous acid (alkali and alkaline earth metal salts); (4) benzoates of alkali metal or alkaline earth metal;

B) for structuring agent: (1) natural waxes (carnauba, bees); (2) mineral waxes (paraffin, microcrystalline hydrocarbon, petrolatum, polyethylene); (3) oxidized microcrystalline wax; (4) phosphoric esters of fatty alcohols c 16-18; (5) polyethylene glycol; and

C) for premix constituent: (1) insoluble minerals (chalk, calcium carbonate, talc, clays, silicas); (2) solid synthetic polymer (all the listed polymer species and genera in claim 1, lines 14-23).

Applicant is required, in reply to this action, to elect a single species for each of (A), (B), and (C) to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is

allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Claim 4, specie (B) is limited to unexemplified structuring agents, species (A) and (C) are generic.

Claim 5, specie (B) is limited to sub-genera (2), (4), and (5) and to unexemplified structuring agents, species (A) and (C) are generic.

Claim 6, specie (B) is limited to unexemplified structuring agents, species (A) and (C) are generic.

The following claim(s) are generic: 1-3, 7, and 8 are generic for all constituents (A), (B), and (C).

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

(A) the four sub-genera for volatile corrosion inhibitor are chemically diverse from each other in that they do not share common structure or equivalence in the art.

(B) the five sub-genera for structuring agent are chemically diverse from each other in that they do not share common structure or equivalence in the art.

(C) the two sub-genera for premix constituent are chemically diverse from each other in that they do not share common structure or equivalence in the art.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew A. Thexton whose telephone number is 703-305-5085. The examiner can normally be reached on Monday-Friday, 8:30 to 6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasudevan S Jagannathan can be reached on 703-306-2777. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9310 for regular communications and 703-872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-306-5665.
